EXPERIENCE

Project Development Intern – Indigo Company

June-July 2026

- Co-architected an end-to-end customer feedback platform from the ground up, concept, KPI framework, and data model, piloted across 5 store locations.
- Redesigned the feedback flow, cutting completion time by over 80% (from 4 minutes to under 40 seconds) via a single-tap, emoji-rated interface.
- Presented the KPI dashboard to headquarters and store managers, securing leadership approval to scale the platform across Indigo's full 52-store network pending pilot data.

Functional & Technical Analyst Intern (Banking Systems) – Accompany Consulting

July 2025

- Went beyond a standard observation rotation to audit transaction data structures across 3 African banking clients undergoing digital transformation, translating business requirements into BRD/FSD specifications.
- Configured Temenos T24 modules (accounts, currencies, transaction structures) to support each client's shift to a digital core banking system.
- Performed API testing and data validation using Postman, flagging inconsistencies later addressed before client deployment.

EDUCATION

Bachelor of Science in Business Administration – Tunis Business School – University of Tunis

2023 – present

Major: Business Analytics | Minor: IT

Relevant courses: BI & DB Management · Data Mining · Decision & Game Theory · Information Systems Assurance and Security

Industry Scholarship Recipient – University of Zurich · UZH Blockchain Center

July 2026

Baccalaureate Diploma in Experimental Sciences, with Honors – Pioneer High School of Sfax

2019 – 2023

SKILLS

Data & Analytics: Python (Pandas, NumPy) · SQL · Predictive Modeling (Scikit-learn, XGBoost, LightGBM)

Business Intelligence: Power BI · Excel/Google Sheets · Dashboarding & Visualization · KPI Design

Business Analysis: Requirements Gathering · BRDs/FSDs · User Research · Market Analysis · Feature Prioritization · Stakeholder Communication

Technical & UX Skills: R · JavaScript · C · MySQL · MongoDB · Git · Postman · Temenos Transact (T24) · Wireframing

PROJECTS & INITIATIVES

Veridian Capital – RWA Tokenization & Escrow Platform – UZH Deep Dive into Blockchain · July 2026

- Won 1st place among 13 teams (64 countries, 72 students) for Veridian, an institutional platform for compliant RWA tokenization with automated escrow, live prototype on GitHub.
- Designed the escrow mechanism to remove counterparty trust from asset custody, applying it to fund solar power access for underserved South African communities through investor-backed installations.

MENA Business Intelligence – Solar Investment Analytics – Business Intelligence & Data Analytics Project

- Built an ETL pipeline to process 165,896 rows of MENA solar investment data spanning nearly 6 years, then developed Power BI dashboards to track investment trends and market performance

Web-Based Facial Authentication System

- Developed a team-based web authentication system using facial recognition, structuring the access-control workflow within a secure web application.

EXTRA-CURRICULAR ACTIVITIES

Member → Secretary General → Head & Executive Officer – *Tunisian International MUN TBS Club*

2023– 2025

- Created a marketing strategy that drove 100K+ views/events and attracted sponsor interest.
- Led a 20-member team across 10 events in 9 months, handling training, teamwork, and crisis response.
- Gained experience in negotiation, market research, academic writing, and public speaking.

2023– 2025

Freelance Design Consulting – *Ran client engagements independently, from briefing through delivery, translating stakeholder input into finished brand identities.*

2020– 2024

Other Activities & Engagements – *Completed training in web development, Photoshop, and cybersecurity.*

CERTIFICATIONS

- HCFI (The Hashgraph Association) · Blockchain Fundamentals (Dar Blockchain & 4HACKS)
- Kaggle: Python, Pandas, Data Cleaning, Data Visualization, Intro & Intermediate Machine Learning
